MS Gold Certified Partner, Bespoke Solutions,
Project Management, Support for Developed Solutions,
Third Party and Website Integration,
Intellectual Property remains with customer.

A Sage Business Partner and Authorised Developer

Paradise are a Sage Business Partner offering you a team of qualified Sage Developers

What products do we offer?

Our specialisation is Sage 200, which we have supported through its life as MMS, MME, Line 100, Sovereign and Sky. Our Sage Team provide a full range of services in this area: Pre-sales advice and planning, supply, installation, customisation, training and support.

In addition, we are also skilled in Sage 50, HR and Payroll as well as the many associated products in this range.

What track record do we have?

Paradise have installed and supported some of the largest Sage 200 deployments in the UK, delivering well-planned roll-outs of the standard product or highly modified versions for specific uses. We support Sage products in a number of household-name companies and the longevity of our relationships speaks volumes about our value, professionalism and enthusiasm for the Sage product range.

What about development?

Using the latest Microsoft .Net technology and techniques, our Sage Development Team can make changes to the product to make it the correct fit for your business model; alternatively we can develop entirely new modules to satisfy business processes that are unique to you. The new Sage products are far more flexible, and more cost effective, than their predecessors. Use this to your advantage and have the Sage system you really want.

What about training and support?

Sage training can be arranged as a classroom exercise in our dedicated training centre, or you can choose to have one of our experienced trainers come to your premises. Support is handled by our Service Desk, providing you with a rapid and well-informed response from a Sage Product Specialist.

How do you go about making an enquiry?

Contact us and discuss your requirements with our Sage Specialists. This is a free service and carries no obligation.

Paradise offers you comprehensive Sage services for all your needs.

To discuss your Sage Software Support, Development or Training requirements call our dedicated Sage Account Manager. Alternatively you can access our website to find out more.
