

PARADISE COMPUTING LTD

Managing a Microsoft Windows Server 2003 Environment

Duration – 5 days

Ref: M2274

Who Should Attend

Before attending this course, students must have:

A+ certification, or equivalent knowledge and skills
Network+ certification, or equivalent knowledge and skills.

Please note: If you attend a course and do not meet the pre-requisites you may be asked to leave.

Course Objectives/Overview

This five day instructor led course provides students with the knowledge and skills to manage accounts and resources in a Microsoft Windows Server 2003 environment. The course is intended for systems administrator and systems engineer candidates who are responsible for managing accounts and resources. These tasks include managing user, computer, and group accounts; managing access to network resources; managing printers; managing an organisational unit in a network based on Active Directory directory service; and implementing Group Policy to manage users and computers.

This is the first course in the Systems Administrator and Systems Engineer tracks for Windows Server 2003 and serves as the entry point for other courses in the Windows Server 2003 curriculum.
