

*We have been using Paradise computing to provide Desktop and Technical ICT Training for a number of years now (since 1998).*

*During this time, Paradise has provided a highly professional service to us and we have established a good working relationship with them. They have always been very flexible and accommodating, providing tailored courses to suit the needs of our users.*

*The feedback received from our users regarding the trainers who carry out the courses and the quality of the material taught to them has been very positive and we are very happy to continue using Paradise for our training requirements.*

*We would have no hesitations about recommending Paradise Computing to other Companies in the future.*

*Gary Steng
