Bespoke Changes to Sage 200

As an accredited Sage Strategic Partner, we offer a full range of Sage products, support, training and development to ensure you are making the most of your systems and processes.

In-House Development Team

Since 1989, Paradise has rolled out and supported some of the largest deployments of Sage 200 in the UK. We understand the challenges that our clients face and our implementation experience will help you and your business make positive transformations.

Whether you are implementing an improvement programme or have a particular pain that needs solving, we have undoubtedly encountered it before and know how to deal with it – quickly and efficiently. Our specialist developers have many years of experience and can customise your Sage 200 with:

- Data Import and Export (including EDI)
- Links to websites (including eCommerce websites)
- Web Services
- Links to third party and in-house products
- Connections to courier systems
- Full-scale Sage 200 add-on modules

Developed in Visual Studio .Net (Visual Basic or C#), our bespoke solutions are all created in-house by our own experienced and dedicated team.

Integration and Development

As well as being a Sage Strategic Partner, Paradise is a certified Microsoft Partner with competencies in .Net development. This means we can address your integration and development requirements in-house and with total confidence. Services include:

- Links to websites
- Integration to third party applications
- Automated import/export utilities

Training and Support

Our experienced training team are available to provide both high level and detailed training, either at your premises or in our dedicated training suite in Northampton. We assess exactly what you need and can deliver accelerated training for new users, or provide new insights and skills to experienced users. Whatever your requirements, you will see more value from the accounts system you have invested in.

Paradise Computing as your Partner

Our focus is always on delivering an exceptional customer experience, as well as offering several added-value services to support you along the way, including our free of charge annual Sage 200 system review and detailed report on how to get the most out of your system and ensure it is used to maximum effect.

Call us on 0330 333 5252 to start exploring various solutions or to discuss your specific requirements.

To find out how Paradise can help your business, or to arrange a demonstration, call us today on 01604 655900 or visit our website www.paradisecomputing.co.uk
